

Vedant Sattegiri Patil

Student-Builder & Security Researcher

Location: Pune, Maharashtra, India • Email: veddoesai@proton.me • GitHub: <https://github.com/vedwebsites-eng>

SUMMARY

15-year-old self-taught builder and security researcher based in Pune. Blending an offensive cybersecurity mindset with modern AI system development and software engineering. Passionate about uncovering edge-case vulnerabilities, creating developer tooling, and educating builders through high-signal technical content.

RESEARCH & INITIATIVES

- **Bug Bounty Research & Vulnerability Hunting:** Active research on web applications, finding logic bugs, access control failures (IDORs), and misconfigurations. Focus on automated recon tooling.
- **Autonomous AI Tooling & Local Intelligence:** Building agentic workflows that turn unstructured instructions into deterministic multi-step tool execution. Integrating Gemini & local LLMs.
- **Technical Media & Content (RootCause):** Creator and producer of RootCause, producing short-form video content covering technology and cybersecurity concepts.

FEATURED PROJECTS

- **AETHOS:** Gamified self-improvement engine with AI coach Ace, dynamic XP curve, cyberpunk UI.
- **RootCause:** Faceless YouTube channel covering tech and cybersecurity in short-form video.
- **Inkwell:** Distraction-free typographic note engine engineered with editorial aesthetics.

EDUCATION

- **Pune High School:** Secondary Education / Class 10, Pune, India

HONORS & HIGHLIGHTS

- 3x Bug Bounty Programs, HackerOne — valid vulnerability disclosed
- 3x AI Workshops completed under Vaibhav Sisinty (Outskill)
- Anthropic Certified — Claude, Claude Code, Claude Cowork
- CCNA (Networking) — in progress
